Rhendalen W Pant

Art nr: 1000462

Previous art. nr: 8881-99

Rhendalen Pant W is 8848 Altitude's most durable technical pantl. The main part of the pant is made of a technical material with 4-way stretch. It follows every movement, and its moisture-transport keeps the body dry. The leg ends, knees and seat of the pant are the most exposed parts to wear and moist, so they are made of waxed T/C fabric with extra high durability. Pre-bent knees to provide a natural fit that also prevents skin irritation and chafing. The included durable stretch belt keeps the pant securely in place. Two robust leg pockets with both zipper and pocket flap with snap button, and two hip pockets with zipper.
