● RB004JDGR - Grey

COMPOSITION

Outside 94% Polyester, 6% Elastane / TPU membrane / Inside 100% Polyester

WEIGHT 315 g/m²

PACKAGING

Individual pack

DESCRIPTION

The hooded softshell jacket is made of three-layer functional fabric. The outer layer makes the garment wear resistant and ensures excellent windproof and water-repellent characteristics while the presence of a TPU membrane guarantees good thermoregulation. The inner fleece side keeps the body warm and dry. The jacket is equipped with a high quality full YKK zip, a front pocket and two side pockets, all with YKK zips. The elbow reinforcements ensure greater durability. The adjustable hem and hood with a drawstring and adjustable cuffs with a velcro closure ensure better protection from the cold and wind.

SIZES S - XXL
